MAP INFORMATION

Map Scale: 1:14,300 if printed on A size (8.5" x 11") sheet.
 The soil surveys that comprise your AOI were mapped at 1:24,000.
 Please rely on the bar scale on each map sheet for accurate map measurements.

Source of Map: Natural Resources Conservation Service
 Web Soil Survey URL: <http://websoilsurvey.nrcs.usda.gov>
 Coordinate System: UTM Zone 14N NAD83

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Reno County, Kansas
 Survey Area Data: Version 8, Nov 29, 2010
 Soil Survey Area: Rice County, Kansas
 Survey Area Data: Version 7, Nov 29, 2010

Your area of interest (AOI) includes more than one soil survey area. These survey areas may have been mapped at different scales, with a different land use in mind, at different times, or at different levels of detail. This may result in map unit symbols, soil properties, and interpretations that do not completely agree across soil survey area boundaries.

Nonirrigated Capability Class

Nonirrigated Capability Class— Summary by Map Unit — Reno County, Kansas (KS155)				
Map unit symbol	Map unit name	Rating	Acres in AOI	Percent of AOI
5882	Dillhut-Plev complex, 0 to 2 percent slopes	5	0.0	0.0%
5971	Tivin fine sand, 10 to 30 percent slopes	6	0.0	0.0%
Subtotals for Soil Survey Area			0.0	0.0%
Totals for Area of Interest			803.5	100.0%

Nonirrigated Capability Class— Summary by Map Unit — Rice County, Kansas (KS159)				
Map unit symbol	Map unit name	Rating	Acres in AOI	Percent of AOI
5882	Dillhut-Plev complex, 0 to 2 percent slopes	5	67.7	8.4%
5884	Dillwyn-Tivin complex, 0 to 20 percent slopes	4	219.1	27.3%
5971	Tivin fine sand, 10 to 30 percent slopes	6	350.3	43.6%
5973	Tivin-Dillhut fine sands, 0 to 15 percent slopes	6	166.4	20.7%
Subtotals for Soil Survey Area			803.5	100.0%
Totals for Area of Interest			803.5	100.0%

Description

Land capability classification shows, in a general way, the suitability of soils for most kinds of field crops. Crops that require special management are excluded. The soils are grouped according to their limitations for field crops, the risk of damage if they are used for crops, and the way they respond to management. The criteria used in grouping the soils do not include major and generally expensive landforming that would change slope, depth, or other characteristics of the soils, nor do they include possible but unlikely major reclamation projects. Capability classification is not a substitute for interpretations that show suitability and limitations of groups of soils for rangeland, for woodland, or for engineering purposes.

In the capability system, soils are generally grouped at three levels—capability class, subclass, and unit. Only class and subclass are included in this data set.

Capability classes, the broadest groups, are designated by the numbers 1 through 8. The numbers indicate progressively greater limitations and narrower choices for practical use. The classes are defined as follows:

Class 1 soils have few limitations that restrict their use.

Class 2 soils have moderate limitations that reduce the choice of plants or that require moderate conservation practices.

Class 3 soils have severe limitations that reduce the choice of plants or that require special conservation practices, or both.

Class 4 soils have very severe limitations that reduce the choice of plants or that require very careful management, or both.

Class 5 soils are subject to little or no erosion but have other limitations, impractical to remove, that restrict their use mainly to pasture, rangeland, forestland, or wildlife habitat.

Class 6 soils have severe limitations that make them generally unsuitable for cultivation and that restrict their use mainly to pasture, rangeland, forestland, or wildlife habitat.

Class 7 soils have very severe limitations that make them unsuitable for cultivation and that restrict their use mainly to grazing, forestland, or wildlife habitat.

Class 8 soils and miscellaneous areas have limitations that preclude commercial plant production and that restrict their use to recreational purposes, wildlife habitat, watershed, or esthetic purposes.
